METAL BUILDING MANUFACTURERS ASSOCIATION Technical Bulletin Spring 2001 New Bolt Specification That's Right, Snug Tight! W. Lee Shoemaker, P.E., Ph.D.

### **New Bolt Specification - That's Right, Snug Tight!**

A steel detailer is a person who produces detailed drawings for steel fabricators and steel erectors. The detailer prepares detailed plans, drawings and other documents for the manufacture and erection of steel members (columns, beams, braces, trusses, stairs, handrails, joists, metal decking, etc.) used in the construction of buildings, bridges, industrial plants, and nonbuilding structures.

A Beginner's Guide to the Steel Construction Manual An introduction to designing steel structures using the AISC Steel Construction Manual, 13th edition. By

### **the Steel Construction Manual - B G Structural Engineering**

WBDG is a gateway to up-to-date information on integrated 'whole building' design techniques and technologies. The goal of 'Whole Building' Design is to create a successful high-performance building by applying an integrated design and team approach to the project during the planning and programming phases.

### **Precast Concrete Wall Systems - Whole Building Design Guide**

Superior structural engineering software for analysis and design by RISA Tech, Inc.

### **RISA - Structural Engineering Software for Analysis & Design**

Front Matter (Title Page, TOC, Preface and Forward) Sample Pages. This new guide fully explains how and why building irregularities impact structural design and provides detailed examples of how to appropriately analyze and design lateral force-resisting elements for various types of irregular buildings located in Seismic Design Category (SDC) B and D.

### **Guide to the Design of Common Irregularities in Buildings**

viii A Beginner's Guide to the Steel Construction Manual www.bgstructuralengineering.com Preface The

creation of the Beginner's Guide to the Steel Construction Manual (BGSCM) was prompted by the major rewrite of the AISC specification that appeared in the 13th edition of the Steel Construction Manual (SCM).

Building information modeling (BIM) is a process involving the generation and management of digital representations of physical and functional characteristics of places. Building information models (BIMs) are files (often but not always in proprietary formats and containing proprietary data) which can be extracted, exchanged or networked to support decision-making regarding a building or other ...
