Chemical Reaction Engineering Solutions Manual - Octave

Mass transfer is the net movement of mass from one location, usually meaning stream, phase, fraction or component, to another. Mass transfer occurs in many processes, such as absorption, evaporation, drying, precipitation, membrane filtration, and distillation. Mass transfer is used by different scientific disciplines for different processes and mechanisms.

Mass transfer - Wikipedia

3 Mean Free Path λ Mean free path of gases λ mean free path - λ air, the average distance traveled between collisions with other gas molecules; λ_{AB} is the average distance traveled by a molecule of A before it

Chapter 7 Solution of the Partial Differential Equations

Swirl and eddies in engineering. The propensity of a fluid to swirl is used to promote good fuel/air mixing in internal combustion engines.. In fluid mechanics and transport phenomena, an eddy is not a property of the fluid, but a violent swirling motion caused by the position and direction of turbulent flow.

Nell'ambito della matematica e dei fenomeni di trasporto, le leggi di Fick sono equazioni differenziali alle derivate parziali ellittiche non lineari che descrivono le variazioni di concentrazione nei materiali in cui sono in atto fenomeni di diffusione molecolare in assenza di diffusione termica, che invece viene tenuta in conto dalla pi¹ generale legge di Soret.

Leggi di Fick - Wikipedia

Flux is een term die in de wiskunde en de natuurkunde wordt gebruikt, maar niet altijd in dezelfde betekenis. In de wiskunde wordt er de doorstroom van een grootheid door een oppervlakte mee aangeduid (dimensie: [hoeveelheid] \cdot [tijd] $^{-1}$). In deelgebieden van de natuurkunde, zoals stromingsleer, wordt er ook wel de doorstroom van een grootheid per vierkante meter mee bedoeld, met als dimensie ...

Interdiffusione e autodiffusione. Un esempio di diffusione "dato dalla diffusione di un gas in un altro gas o di un liquido in un altro liquido: in questo caso si parla anche di interdiffusione.. Si ha il fenomeno di diffusione anche quando ad esempio, un gas ha densità diversa da un punto all'altro per cui le molecole di gas diffondono attraverso il gas stesso: si parla in questo caso di ...

In conventional electrolysers with the classical plate-and-frame equipment (see Fig. 3), the feed channels are created by interposing between the membranes net spacers, maintaining a fixed inter-membrane distance and providing some mixing promotion in the channels. Spacers are provided with gaskets along the perimeter of the channels, which seal the channels and guide the solutions through them.
