acting with these decisions is needed. This applies to data-gathering contexts provided by surveys, experimental contexts such as the ones occurring in con-joint and in eye-tracking studies, new media contexts provided by, e.g., the Internet, and also to actual decision making contexts such as retail outlets, etc.

Marketing data, models and decisions

A data model describes how structured data is represented in a business environment. Data modeling is a natural consequence of the prevalence of management information systems (MIS) in the real world. Together they form what in our days has become known as a Data Analytics system that provides management tools to evaluate performance and make decisions.
