The first four tables show only the largest one-day changes between a given day's close and the close of the previous trading day, not the largest changes during the trading day (i.e. intraday changes). The two largest point drops in history occurred the week of February 5, 2018, though this chiefly reflects the absolute magnitude of the Index at the time; in percentage terms, it doesn't have ...

Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.
