Psychological testing is the administration of psychological tests, which are designed to be "an objective and standardized measure of a sample of behavior". The term sample of behavior refers to an individual's performance on tasks that have usually been prescribed beforehand. The samples of behavior that make up a paper-and-pencil test, the most common type of test, are a series of items.

Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, early delivery, and

continual improvement, and it encourages rapid and flexible response to change.

Recently I have been approached by some of my close friends to join some chain marketing company. Normally, chain marketing companies works on the principle of Pyramid Scheme. A pyramid scheme is a non-sustainable business model that involves the exchange of money primarily for enrolling other people into the scheme.
